

2021 SUMMARY REPORT

Commercial Feed Inspections

PLANT INDUSTRIES DIVISION

BUREAU OF FEED AND SEED

Missouri Department of Agriculture Mission Statement

To serve, promote, and protect the agricultural producers, processors, and consumers of Missouri's food, fuel, and fiber products.

The Missouri Department of Agriculture (MDA) Plant Industries Division, Bureau of Feed and Seed (Bureau) assists the state's feed industry and consumers through inspection and product testing as well as providing information to assist in making buying decisions. The Summary Report of 2021 Commercial Feed Inspections includes data from over 1,300 inspections and over 33,000 laboratory tests. This report is provided as an annual review of the bureau's responsibilities and accomplishments and as reference material.

New strains of COVID 19 made 2021 a challenging year for the Bureau and the regulated industry. Once again, the Bureau extends it thanks to the many firms in our state that worked with us to continue to assure a safe and secure feed supply through the difficult circumstances we experienced this past two years.

In 2020, the program was recognized by FDA as reaching full implementation of the [Animal Food Regulatory Program Standards \(AFRPS\)](#). Full implementation of the AFRPS standards was the culmination of 5 years of work and made possible by a \$3,000,000 FDA grant. This grant also made it possible for the Missouri Department of Agriculture Feed Control Laboratory to become ISO IEC 17025 accredited. This establishes a quality management system for the laboratory. We believe these successes represent significant contributions to the Missouri Department of Agriculture's achievement of its mission: "To serve, promote, and protect our agricultural producers, processors and consumers of Missouri's food, fuel and fiber products".

In 2021, the Bureau worked to obtain the objectives of two FDA Cooperative Agreement grants. One of the grants is a five year \$1,500,000 grant to maintain compliance with the [Animal Food Regulatory Program Standards](#). The other grant is a five year, \$1,500,000 grant to build capacity to inspect animal food facilities for compliance with the Current Good Manufacturing Practices (CGMP) and the Preventive Control (PC) Rule for Animal Food under state authority. This will assure that state inspection personnel will be conducting PC and CGMP inspections in the state. The grant funds will increase program regulatory capacity and pivot the program to more of a focus on food safety.

One of the significant emphases of the PC grant is to educate small and mid-size firms on the requirements of Preventive Control Rule. The training will get underway in the coming year and will provide extensive assistance with providing Preventive Control Qualified Individual (PCQI) training and the development of the food safety plan which is required by the rule. This education is projected to assist as many as a 140 feed facilities within the state. Another major objective of PC Grant is to provide training for the inspection staff to conduct PC and CGMP inspections.

The Bureau has seven staff trained to conduct inspections under ([21 CFR Part 507](#)) as part of the Food Safety Modernization Act. MDA staff performed GMP/PC inspections in 2021. Staff inspected Missouri feed facilities to review the practices of manufacturers and/or distributors of feed products containing prohibited mammalian protein in

compliance with Federal Rule 21 CFR Part 589. These inspections are designed to make sure no prohibited protein is fed to ruminant animals. In 2021, the Bureau performed 8 BSE inspections. The Missouri Feed Program and Feed Control Laboratory were recognized this year by FDA and other states for the quick response to a large incident of aflatoxin in pet food. As a result of the thorough investigations and swift processing of a significant number of samples collected by our inspection staff, thousands of pounds of adulterated product were removed from store shelves. Midwestern Pet Food's decision to recall the products from the market came about as a result of the work the program did. The Missouri Feed Program was the leader in standing up a rapid response team and quickly expanded its work to include other states and the FDA.

The Bureau conducted contract inspections for FDA in 2021. The program staff inspected two 507 Preventive Controls (PC) inspections which were comprehensive included coverage under the 507 Current Good Manufacturing Practices (CGMP) and Preventive Control (PC) rules. There were fifty-seven 507 cGMP inspections completed for the year. Of those, six Medicated Good Manufacturing Practices (GMP) inspections were conducted at federally licensed medicated feed manufacturing establishments. An additional 38 medicated feed inspections were conducted at medicated feed production plants not licensed by FDA. The program also inspected under contract 13 non-medicated feed mills and 17 feed facilities for compliance with the Bovine spongiform encephalopathy (BSE) rule ensuring the safety of the nation's beef supply. These inspections are a vital part of the food safety initiative for all animal feed. The program ensures legally approved levels and combinations of drugs and antibiotics are used in feed products and that each facility's housekeeping, records, labeling, cleanliness and other practices are in compliance with 21 CFR Part 225.

Food safety is also addressed in the bureau's annual survey of corn produced in the state. In addition to providing test information to manufacturers for crude protein levels, the bureau tests for aflatoxin, fumonisin, vomitoxin and zearalenone. If corn is found containing toxin levels exceeding FDA guidelines for safe use for livestock, notifications are sent immediately to the facility at which the corn was sampled. Toxin levels in corn were generally low in Missouri corn in 2021.

The Bureau of Feed and Seed inspectors responded swiftly to thirteen complaints in 2021 about the quality or safety of feed or feed ingredients. When problems required testing beyond the scope of the feed program or the capabilities of the Missouri Feed Control Laboratory, other agencies were utilized or samples were sent to other laboratories for testing.

The Bureau of Feed and Seed cooperates with the Plant Pest Program and the USDA to obtain samples from Missouri's wheat production on a biannual basis. The assurance provided by this testing allows Missouri wheat to be exported to many countries that require the testing. Forty-two wheat samples were collected for analysis for karnal bunt wheat disease

in 2021. These samples, when found to be free of the disease, help Missouri farmers export their wheat to many countries which require the testing.

The Bureau of Feed and Seed took regulatory action against unlicensed companies or those who failed to file tonnage reports. Those actions are reported in “Violations Other Than Failure to Meet Label Claims.”

In 2021, inspectors collected 3,966 samples of finished feeds and feed ingredients. The collected samples were tested for adherence to label guarantees, resulting in 33,367 individual assays in 2021. If testing revealed a deficiency or excess from the guaranteed analysis or something of a detrimental nature, a Withdrawal from Distribution Order was issued immediately. There were 539 withdrawals issued in 2021, for a statewide compliance rate of 85.30%. A total of 268 service and complaint samples were analyzed in 2021.

The Missouri Feed Control Laboratory analyzed fifteen customer-formula samples in 2021. Customer-formula feeds are those for which the customer has designed his own ration and asks for specific ingredients in specific quantities to be blended by the manufacturer. Each customer requesting the feed, as well as the manufacturer of the feed, received an analytical report showing nutrient levels found in the sample. In addition, customers received a questionnaire to confirm they received the quality of feed requested.

The Excellence in Compliance Award Program recognizes feed companies who have achieved at least 90% adherence to label guarantees on five or more samples tested by the laboratory. The companies must also be up-to-date with all fees and reporting. Eighty-one companies qualified for the award in 2021. Forty-two of those are located in Missouri.

**PLANT INDUSTRIES DIVISION
BUREAU OF FEED AND SEED
PERSONNEL & INSPECTOR AREAS**

Administration

Paul Bailey, Director Plant Industries
Stan Cook, Program Manager, Feed & Seed
Jacob Fleig, Program Coordinator, FSMA
Mary Koestner, Quality Assurance Manager
Madison Fink, Pet Food Coordinator
Maghan Lage, Executive I
Erin N. Tice, Administrative Support
Megan Moore, Administrative Support
Laura Schaefer, Administrative Support

Missouri Department of Agriculture

To serve, promote, and protect the agricultural producers, processors, and consumers of Missouri's food, fuel, and fiber products.

U.S. Food and Drug Administration Guidelines for Aflatoxin Levels

Corn containing less than 20 parts per billion aflatoxin is considered safe by the U.S. Food and Drug Administration for use in all animal feed. Corn exceeding 20 ppb can be fed only for specific age, weight, and production stage. Corn exceeding 300 ppb must be blended with corn containing little or no aflatoxin before feeding is allowed to specific age, weight, and production stage of livestock. Before corn can be blended for out-of-state shipment, the U.S. Food and Drug Administration must be notified and permission obtained from the Missouri Department of Agriculture for this to be allowed.

U.S. Food and Drug Administration guidelines are as follows:

Aflatoxin Level (in parts per billion)	Class of Animal	Commodities
20 ppb	Dairy animals, animals not listed below, or unknown use	For corn, peanut products, cottonseed meal and other animal feeds and feed ingredients
20 ppb	Immature animals	For corn, peanut products and other animal feeds and feed ingredients, but excluding cottonseed meal
20 ppb	Pets (dogs, cats, rabbits, etc.) of all ages	For corn, peanut products, cottonseed meal, and other food ingredients and complete pet food
100 ppb	Breeding cattle, breeding swine, and mature poultry (e.g. laying hens)	For corn and peanut products
200 ppb	Finishing swine (100 pounds or more)	For corn and peanut products
300 ppb	Beef cattle, swine, poultry (Regardless of age or breeding status).	For cottonseed meal
300 ppb	Finishing beef cattle (e.g. feedlot cattle)	For corn and peanut products

U.S. Food and Drug Administration Guidelines for Fumonisin Levels

Corn and corn by-products containing less than 5 parts per million fumonisin is considered safe by the U.S. Food and Drug Administration for use in all animal feed. Corn and corn by-products exceeding 5 ppm can be fed only for specific species, age, and production stage. The recommended maximum levels for fumonisin in animal feeds that FDA considers achievable with the use of good agricultural and good manufacturing practices are presented below. FDA believes that controlling fumonisin to these recommended levels can reduce exposure to fumonisin that may be found in corn products intended for animal consumption.

Class of Animal	Commodities & Portion of Diet	Levels in Corn & Corn By-products (in parts per million)	Levels in Finished Feeds (in parts per million)
Equids and rabbits	For corn and corn by-products not to exceed 20% of diet **	5 ppm	1 ppm
Swine and catfish	For corn and corn by-products not to exceed 50% of diet **	20 ppm	10 ppm
Breeding ruminants, breeding poultry and breeding mink*	For corn and corn by-products not to exceed 50% of diet **	30 ppm	15 ppm
Ruminants < 3 months old being raised for slaughter and mink being raised for pelt production	For corn and corn by-products not to exceed 50% of diet **	60 ppm	30 ppm
Poultry being raised for slaughter	For corn and corn by-products not to exceed 50% of diet **	100 ppm	50 ppm
All other species or classes of livestock and pet animals	For corn and corn by-products not to exceed 50% of diet **	10 ppm	5 ppm

*Includes lactating dairy cattle and hens laying eggs for human consumption

**Dry weight basis

2021 Corn Survey

The Missouri Department of Agriculture is happy again to report the results on our annual monitoring of aflatoxin in corn. This survey has been reported yearly since 1993. We also analyze all customer complaint samples for aflatoxin when symptoms suggest adulteration. Laboratory tests are conducted to determine the average crude protein in corn. In 2021, the average crude protein for corn was 6.70%, lower than 7.59% in 2020's corn crop. Each sample was adjusted to a 13.5% moisture level.

Samples of corn are drawn from counties having an expected production of greater than 1.5 million bushels, with one sample added for each additional two million bushels produced. 144 samples were tested for aflatoxin. Only two positive results were found. One sample tested to be in the 10-20 ppb range and one in the 20-49 ppb range. Seventy-eight samples were tested for fumonisin. Fifteen positives were found; four in the 0-5 ppm range, seven in the 5.1-10.0 ppm, three in the 10.1-20 ppm range, and one in the 21.1-30 ppm range.

The Missouri Department of Agriculture is committed to food safety and quality for the protection of our state's consumers. Our mission is to continue to serve, promote, and protect the agriculture producers, processors and consumers of Missouri food, fuel and fiber products.

Excellence in Compliance Award

The Excellence in Compliance Award is designed to recognize those companies who have high standards and have met or exceeded a 90% rounded average compliance in 2021. Those companies are listed below.

The Missouri Department of Agriculture will issue a certificate to honor those companies that have met or exceeded the following criteria:

- At least five random official regulatory samples must have been taken by a Missouri Feed and Seed inspector and been analyzed by the State Feed Control Laboratory in 2021.
- A 90% passing compliance rate on five or more samples must have been achieved for the 2021 calendar year.
- The company labeling the feed or feed ingredient must be in good standing with the Bureau of Feed and Seed, retain a Missouri Commercial Feed License, and have all quarterly inspection fees or yearly product listing (pet and specialty pet foods) paid as required.

A total of 81 feed labelers have achieved a 90% or better compliance rate in Missouri in 2021.

Forty-two of these companies maintain an address in the state of Missouri and 38 are located outside of Missouri. A number of companies with out-of-state addresses have manufacturing facilities in Missouri.

			Wheat Products	245,787
			Yeast	19,339
			Miscellaneous Products	292,786
			TOTAL	4,570,200

SECTION ONE

Section One is intended to show the reliability of labelers in meeting their claims for feed quality. Inspections were planned on a random basis. The greater the number of samples taken per labeler, the greater the probability that the consistency in meeting claims shown will represent how well the labeler met guarantees.

SECTION TWO

Section 2 lists regulatory actions taken on violations other than failure to meet the guarantees. Violations of the law other than not meeting guarantees include: failure to obtain a Missouri Commercial Feed License, failure to pay inspection fees, negligence in revising the labeling, and failure to label the feed as required by law and as requested by the Missouri Department of Agriculture.
